Profile

Computer Science undergraduate with strong knowledge of Data Structures, Algorithms, and programming. Skilled in software development, data science, and machine learning. Hands-on experience in data analysis using NumPy, Pandas, Matplotlib, and Scikit-learn. Strong in analytical thinking, problem-solving, communication, leadership, teamwork, and collaboration. Committed to continuous learning and contributing to data-driven projects in the tech industry.

Education

B. Tech Computer Science and Engineering | SRM Institute of Science and Technology | Chennai (2024–2028) | CGPA: 9.83
12th Grade – PCMC | M.C.C Matriculation Higher Secondary School, Chennai (2023–2024) | Percentage: 77.8%
10th Grade – | M.C.C Matriculation Higher Secondary School, Chennai (2021–2022) | Percentage: 93.8%

Skills & Abilities

Technical Skills: Python, NumPy, Pandas, Matplotlib, Scikit-learn, Exploratory Data Analysis (EDA), C, C++, Java, SQL, HTML, CSS, JavaScript, React.js,

Tools & Platforms: Git, GitHub, VS Code, IntelliJ, PyCharm, Jupyter Notebook, Anaconda, Google Colab, Tableau, Power BI, Linux, Operating Systems, Antigravity, Claude code, Cursor, Codex

International Immersion Program

Global Immersion & Internship Programme – Singapore

SRM Institute of Science and Technology | Feb 2025 | Singapore

- Represented SRM in a 5-day international programme integrating global exposure and applied learning in urban innovation, sustainability, policy, and collaboration.
- Collaborated with institutions including **Urban Redevelopment Authority (URA)**, **Lifelong Learning Institute**, **Hyundai Motor Group Innovation Centre Singapore (HMGICS)**, and **National University of Singapore (NUS)**.
- Participated in sessions on smart cities, artificial intelligence, mobility innovation, sustainable development goals (SDGs), and governance frameworks.
- Conducted site visits to Marina Barrage, Former Ford Motor Factory, Land Transport Authority, and Parliament of Singapore, gaining insights into infrastructure, heritage, and policymaking.
- Earned certifications from ACE International PTE LTD, Commonwealth Students Association, G17 University Ambassadors Consortium, Singapore South Asia Chamber of Commerce and Industry, and Commonwealth Youth Council.

Internships

Internship Trainee - Data Analytics Intern

Oasis Infobyte | New Delhi, India (Remote) | Dec 2025 – Jan 2026

Worked on machine learning and data analytics projects using Python, developing classification and prediction models including Iris Flower Classification and Car Price Prediction. Conducted unemployment rate analysis and generated data-driven insights through reports and visualizations.

Internship Trainee - Data Science & Machine Learning Intern

Labmentix | Bengaluru, Tamil Nadu, India (Remote) | Jun 2025 – Jul 2025

Executed diverse data science and machine learning projects, including time series forecasting of FBI crime trends (ARIMA, Prophet), job market analysis via web scraping and Glassdoor data, financial risk modeling with PaisaBazaar credit datasets, business insights dashboards from PhonePe transactions, and CNN-based brain tumor detection, strengthening expertise in Python, Pandas, NumPy, Scikit-learn, TensorFlow, EDA, data visualization, model evaluation, ethical AI, and end-to-end data pipeline development.

Internship Trainee – Artificial Intelligence & Machine Learning

PLACEMANTRA PVT LTD | Bengaluru, Tamil Nadu, India (Remote) | Oct 2024 – Dec 2024

Developed machine learning models, including a spam detection system using NLP and binary classification, and implemented clustering algorithms for pattern recognition, with practical experience in data preprocessing, model evaluation, and real-world data analysis using Python.

Courses and Certifications

- Data Analytics using Python & SQL from **NIIT**
- Artificial Intelligence & Machine Learning from **ICTRD**
- Java Programming from **Great Learning**
- UI Development with React from **FITA Academy**
- AWS, GCP, AZURE Basics from **Udemy**
- Programming in C from **SSI Limited**
- Design Thinking from **NPTEL**
- C++ Programming, Kali Linux, Word Press, Git and GitHub from **Simplilearn**
- JavaScript, HTML from **TCS iON Digital Learning Hub**

Projects

UNO vs Agentic AI

Technologies: HTML, CSS, Javascript, Agentic AI

A browser-based UNO card game where the opponent is powered by an agentic AI. The AI evaluates hand state, tracks played cards, and makes strategic decisions mimicking human-level UNO play with dynamic rule enforcement and animated card interactions.

Disaster Resource Management System

Technologies: React.js, Node.js, MySQL, Google API, JavaScript

Full-stack web application with secure Google OAuth authentication and an ACID-compliant MySQL database. Features structured request verification, priority-based resource allocation, and transaction management for real-time disaster relief coordination.

Diabetics Early Diagnosis

Technologies: React.js, Python, Scikit-Learn, Fuzzy Logic, ML

Hybrid ML system combining fuzzy logic with classical classifiers for early-stage diabetes detection. A React-powered interface lets users input clinical data and receive interpretable risk assessments with confidence scores.

Activities and Interests

- **TechVayuna AI Domain Lead:** Collaborate with peers on AI-related projects and initiatives, gaining hands-on experience in machine learning and data analytics.
 - **Consistent Learner:** Committed to continuous growth through online courses and regular practice of data structures and algorithms (DSA) in free time.
 - **Creative Writing:** Enjoy writing on diverse topics, enhancing communication and expression skills.
 - **Computer Society of India (CSI):** Active participant in workshops and events, expanding knowledge and professional connections.
-
